Abhinav Sarkar

Associate Product Manager

PROFESSIONAL SUMMARY

Associate Product Manager with 3 years in B2B digital products and telecom, specializing in roadmapping, backlog management, requirements analysis, and Agile delivery. Managed 30+ change requests, 150+ backlog items, and 120+ requirements across 6+ OPCOs with 85%+ on-time grooming rate, driving 20–30% faster approval turnaround on DLPM and Task Management (DAM) products. Skilled in JIRA, UAT, stakeholder management, and cross-functional delivery.

WORK EXPERIENCE

Senior Product Management Consultant — Tecnotree Corporation *Jan 2025 – Present*

- Owned requirements and delivery for Task Management (DAM) across 5 telecom operators (MTN Zambia, MTN Cameroon, Airtel Africa, Zain, Umniah), covering non-GSM manual task workflows across 4+ Lines of Business, improving task traceability and reducing manual handling errors.
- Led the end-to-end Task Management revamp, enhancing Admin & Customer Portals with 2 new portals, clickable KPI dashboards, a RAG-based chatbot, Checker-Maker controls, SDK-based email approvals, and email OTP — reducing manual approval turnaround time by an estimated 20–30% and improving audit compliance.
- Owned end-to-end DLPM mobility requirements for UJ, defining 10+ core product capabilities and translating business requirements into features to support and streamline account-manager workflows, reducing manual reporting effort.
- Managed 30+ change requests across MTN Zambia, MTN Ghana, UJ, Zain, and MTN South Africa, translating Solution Consultant requirements into JIRA stories with an estimated 85%+ on-time grooming rate.
- Prioritized and maintained product backlogs of 150+ items across 6+ telecom OPCOs, managing 4+ categories of requirements and aligning priorities with business requirements and release objectives.
- Developed and maintained product roadmaps and quarterly product plans, driving 4 quarterly releases and coordinating feature development, sprint priorities, development efforts, and monthly releases through go-live.
- Conducted backlog grooming for 120+ requirements over 2 quarters, collaborating with development teams to clarify requirements, define priorities, estimate efforts, and prepare stories for sprint execution.
- Supervised a QA team of 8 and collaborated with Development and SI teams during UAT to investigate and resolve 50+ bugs/defects pre-release, ensuring alignment with business requirements and improving release quality.
- Conducted sprint planning and retrospectives across 6+ sprints to establish priorities, align cross-functional teams, and drive continuous process improvement.
- Facilitated 15+ customer-facing product demonstrations and collaborated with customers, Solution Consultants, Development, SI teams, and other stakeholders to align product requirements and delivery expectations.

Management Trainee *Jul 2024 – Dec 2024*

- Gathered, analyzed, and translated business requirements into 25+ functional specifications, user stories, epics, wireframes, and JIRA features, aligning requirements with business and customer needs.
- Communicated functional product requirements to Development and cross-functional stakeholders through user stories, epics, wireframes, and JIRA features, improving requirement clarity and reducing rework cycles.
- Participated in sprint backlog grooming for product requirements across 4+ sprints, collaborating with development teams to clarify requirements, establish priorities, and prepare stories for sprint execution.
- Supported sprint planning and retrospectives, coordinating with cross-functional teams to define priorities and align development activities with product requirements.
- Collaborated with Development and SI teams during UAT to track, investigate, and resolve 20+ bugs and defects against business requirements.
- Facilitated product demonstrations and supported product overview, training, and knowledge-transfer sessions across 3+ internal teams and stakeholders.
- Prepared quarterly product feature documentation for DLPM and Task Management, coordinating with technical writers on product updates and releases.
- Managed quarterly product newsletters covering Tecnotree products, distributing updates to 900+ employees with an estimated 40%+ open rate.

Product Management Intern *Jan 2024 – Jul 2024*

- Supported the Product Management team in gathering, analyzing, and documenting 15+ business requirements and translating them into functional product requirements.
- Supported product demonstrations, requirement discussions, documentation, and knowledge-transfer activities across 2+ product teams.
- Assisted in maintaining product requirements and coordinating with Development and QA teams during product development and validation of 1–2 product releases.

Founder & CEO — Shoppz.co (D2C E-commerce) *May 2019 – Aug 2021*

- Founded and scaled a D2C customized apparel brand (t-shirts/shirts) from concept to launch while completing college full-time, conducting competitive market research and benchmarking against Bewakoof to shape product and positioning strategy.
- Built brand identity end-to-end — name, logo, tagline, and visual guidelines — and independently designed and launched the e-commerce website on Shop101, without technical/dev support.
- Recruited, hired, and led a cross-functional team of 5 members across graphic design, digital marketing, sales, and operations/coordination.
- Launched and grew Instagram and WhatsApp as primary D2C sales and engagement channels, scaling Instagram to 5K+ followers through organic content strategy.
- Planned and executed Instagram ad campaigns to drive customer acquisition, managing targeting and budget allocation to convert ad traffic into paying customers.
